* Status- this is the status of the permit, which may or may not equate to activity at the mine. Some permits dictate the time of year a mine may be worked, thus, while the permit is active during the winter there may not be any mining occurring.

** TC- stands for "Temporary Cessation" this means that the mine will not be active during its normal working time. The reason for a TC is that the mine operator wants to "stop-the-clock" on the reclamation permit.
